TRIGANO

More than 80 years' experience

designing new and innovative solutions
for the leisure and holiday home industry.
Our products are made in France, in our
Sarthe, Drôme and Loiret factories.

Technical adaptations

to optimise canvas treatment
and ease of use
(assembly/disassembly).

Life-size testing.

Our models are assembled and tested
over several years in outdoor locations
on our production sites.

A strict quality policy

that remains consistent over every
part of the production process,
guaranteeing your investment over
the long term.

All of our tents are protected by a 5-year guarantee if you
choose the TRIGANO installation service.

Expertise

The Floor

We source our wood from sustainably managed Scandinavian forests.

The Class 4 pine treatment provides crucial longevity for our lodges and bungalows

The Structure

Whether wood or steel, our structures are weather-resistant and can stay up all year round.

Our structures are made from galvanized steel and Class 4 autoclave-treated pine.

The Canvas

The outer canvas layer is made from PVC M2 or Tencate M1 fire-resistant fabric.

These canvases are water-proof, UV-resistant, tear-proof and mould-resistant.

World-class canvas quality

CampShield Fabric

This technology offers several advantages:

- ✓ Extra safety and protection from fire (M1 class fire resistance)
- ✓ A more resistant canvas
- ✓ A striking, cotton-finish appearance
- ✓ Only for the Kenya and BALEARES lodges

Prestressed

Some of our canvases are manufactured using Serge Ferrari® prestressed technology. Unlike a standard coated textile, prestressed canvases provide:

- ✓ Extra safety and protection from fire (M2 class fire resistance)
- ✓ Good resistance and a longer product lifetime
- ✓ Ease of maintenance

The Trigano Group is committed to preserving our natural surroundings and protecting the environment. Our company ethos and 80 years of business in the open-air leisure industry depend on it.

An environmentally friendly solution

The very concept of a canvas-roofed bungalow is good for the environment. Thanks to the low-impact design of these wood and canvas buildings, we remain in harmony with our natural surroundings.

Wood is one of the greatest natural materials we have access to. By sourcing it from sustainably managed forests and using it for Trigano canvas bungalows, lodges and terraces, we can ensure that it is fully and harmoniously integrated into the environment.

Trigano will also collect the materials when they reach the end of their useful life.

As 95% of our materials are recyclable, we can reintegrate them into the manufacturing process.

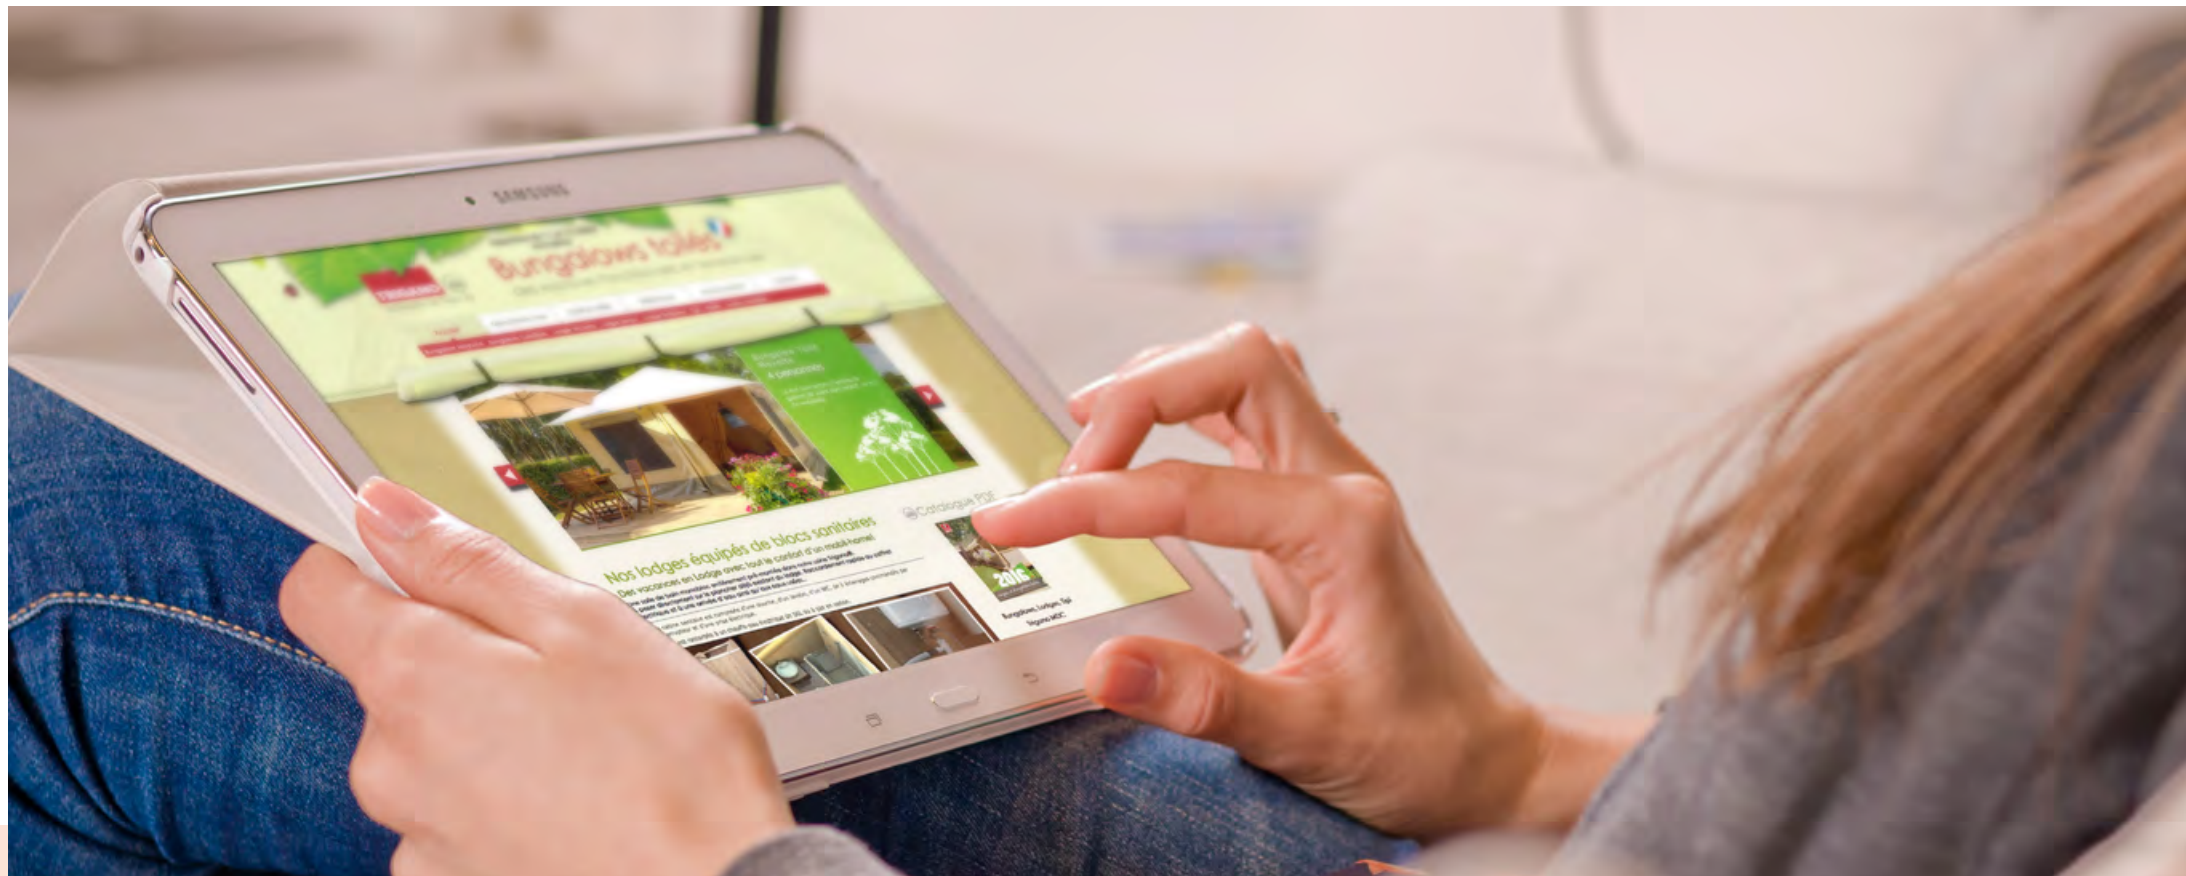

In partnership with TEXYLOOP, we can also recover your old canvases. These can be reprocessed or recycled at a rate of up to 95%.

At Trigano, we are also aware of our own impact on the environment. This is why we only use aqueous glues that do not contain VOCs (Volatile Organic Compounds).

Finally, at Trigano we encourage our suppliers to implement a waste recycling and reprocessing strategy for their own operations.

TEXYLOOP®

Trigano and You

Trigano provides a free service that promotes your page on our website.

Trigano provides a free service that promotes your page on our website.

The internet is now the dominant media when it comes to camping and outdoor leisure activities. But it's not enough to just have a website. You need more: you need search engine optimisation to enable your clients to find you at the click of a mouse.

Our site www.trigano-hpa.com is exceptionally well optimised, especially on Google. We'd like to share this optimisation with you.

To achieve this, we've set up an interactive map that guides clients right to your homepage.

We also provide a range of photos and videos of each Lodge and Bungalow, making your brochures and websites even more attractive to your clients.

Safari Journey

The Safari atmosphere of this lodge will take guests on an adventure that is really out of the ordinary, charmed by the wood frame and the cotton-like appearance of the Tencate fabric.

Our furniture kits in acacia or pine blend in perfectly with the wood frame and the Tencate fabric.

The Kenya can remain assembled throughout the entire year (with an optional Altitude Kit for snow-covered areas).

Whatever the weather

The structure underpinning this lodge is highly resistant, made from the strongest materials.

The frame is made from Class 4 autoclave-treated pine with steel connectors, and the outer walls are made from CampShield fabric held tight with stainless steel ratchet clasps.

The Kenya can stay up all year round (with the optional Altitude kit for snowy areas).

The height of the pilotis can be adjusted from 18 to 92cm, ensuring that the floor can adapt to all kinds of terrain without any deterioration. Our 2, 3 or 4-step staircases can be installed at the front or the side of the lodge.

New **Vintage** Style

The newest addition! The Kenya range now comes with new furniture made from vintage pine decorated with a stylish touch of aged iron.

The bathroom and separate toilet both come equipped with the vintage electrics kit.

This furniture was specifically designed for intensive use and is weather resistant beneath the fabric.

A functional **Kitchen**

Furniture with significant storage capacities – a 4 ring gas stove – An anthracite kitchen sink equipped with a stylish set of taps.

Create a **cosy** space

Lodges for the whole family

The Kenya lodges are designed with 2 bedrooms located at the rear or on the right depending on the model.

The main bedroom features a double bed, while the second bedroom has a bunk bed with room for 3 children or 2 adults.

The Kenya 46 model has an optional double sofa bed in the lounge/living room area, with a TV optional as well.

Enjoy all the comfort of a spa break On your own front porch

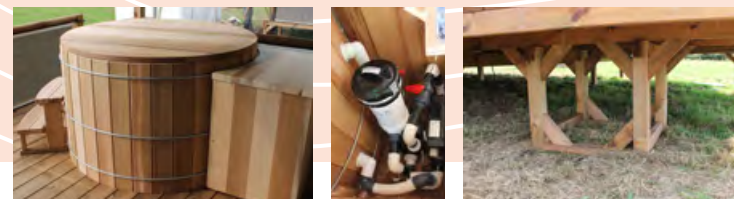

Our four-seater Nordic bath can be installed right onto the terrace of the lodge. This heated bath is great for your health and well-being, offering your clients a chance to unwind in the open air.

STØRVATT®
MODERN SPA BATHS

Storvatt have been manufacturing Nordic baths in France since 1997. They've created a custom made Nordic bath that blends seamlessly with the terraces of our canvas-roofed lodges.

Storvatt take pride in their mastery and craftsmanship with Red Cedar, a high-quality and exceptionally durable wood.

The solid wood components are meticulously assembled. The bands around the baths are made from curved, threaded stainless steel bars and the wood is finely sanded for an exceptionally smooth texture. The electrical heating and filtration system are connected to our power shedding system, meaning there's no need to increase the power to the bath.

Technical specifications

Kenya 25

Structure

Frame	Autoclaved class 4 pine, Ø 80mm + galvanised steel connectors and rust-brown polyester paint
Optional railing	Railing with BATYLINE FERRARI grill protection

Canvas

Interior canvas, walls and gables	Polyester velum 205g/m² - M1 thermal insulation
External canvas	CampShield FR1 Tencate fabric 420g/m² - M1
Roof canvas	Twin-colour PVC 630g/m² - M2 Ferrari STAM
Canvas tightening	On the ground, using rings and rails
Roof-frame attachment system	Stainless steel ratchet straps
Facade	1 large door split in two, zip closing. Padlock locking (not included)
Terrace siding (optional)	PVC 630g/m² - M2 Ferrari
Terrace	Covered terrace of 12m² + 3m² uncovered as XL floor

The Vintage Kenya Bathroom (for Kenya 46 and Kenya 34 Rooms at the right)

Bathroom comes pre-assembled, to be fitted directly onto the lodge's pile flooring
 Comprises an LED-lit shower, a wash hand basin, a separate toilet accessible via a sliding door, 2 vintage switch-controlled lights and an electrical socket.
 Vintage pine wall.
 75 litre electrical water heater with built-in pressure regulator.
 Easy to connect to the electrical cabinet, to a water supply and to the waste water network

Single block bathroom (for Kenya 34 Rooms at the left)

A single block bathroom unit, fully pre-assembled in our factories, to be installed directly on the piloti-mounted lodge flooring
 Includes a shower, sink, WC, 2 lights operated by a switch and an electrical plug socket
 Soft vinyl floor, 16mm melamine-coated chipboard walls with natural oak décor, lockable door
 75 litre electric boiler with integrated pressure limiter
 Quick to connect to the electrical cabinet, power supply and waste-water outlet.

Flooring

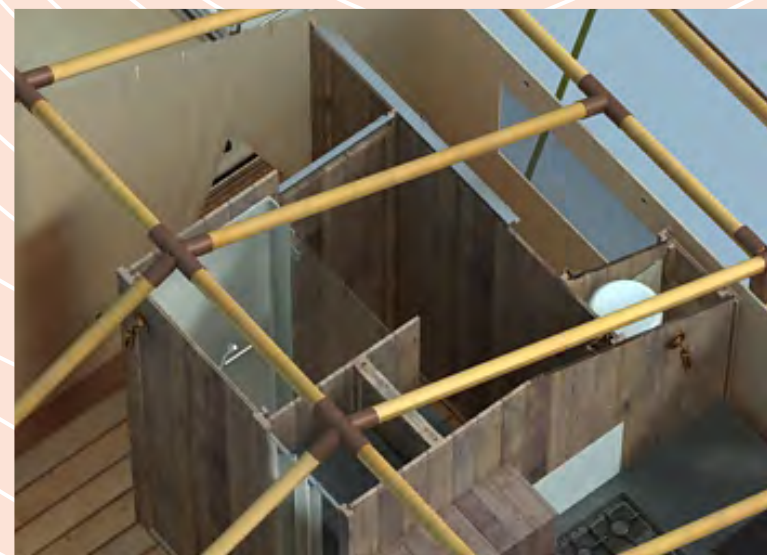

Piloti-mounted flooring

Class 4 autoclave-treated according to European standards, sourced from certified Scandinavian forests

Installation on gravel-covered slabs
 Flooring can be adjusted from 18 to 99 cm to adapt to the terrain
 Wooden planks 27 x 145mm
 Fitted with sixteen 90 x 90mm posts
 95 x 45mm strips and 120 x 45mm cross ties,
 Under-floor tarpaulin to exclude draughts
 Stainless steel screw fittings
 1 stairs from 1 to 4 steps.
 Optional stair railing.

VICTORIA 20

The finest **materials** zinc-plated steel

With a 40x2mm zinc-plated steel structure with a rust-effect finish, reinforced with braces and water-repellent bars and finished with a Ferrari PVC canvas secured with stainless steel pawls, the Victoria 30 is a Lodge built with quality in mind.

It can stay up all year round (except in regions with heavy snowfall), and the height of the pilots can be adjusted from 18 to 92cm, ensuring that the floor can adapt to all kinds of terrain without any deterioration.

Our 2, 3 or 4-step staircases can be installed at the front or the side of the lodge.

A Space to **relax** in

Two well-secluded bedrooms with the interior canvas mounting meaning you can relax inside, even during the day. The main bedroom has space for a large bed while the other bedroom has space for a bunk bed with room for 3 children or 2 adults. The bedrooms are located on the left-hand side of the Lodge when it has been fitted with our single-block bathroom.

Take a break in a lodge.
It's the perfect place to kick
back and relax.

With two bedrooms overlooking the front of the Lodge, you'll be able to lie back, relax and enjoy the scenery. The bedrooms can be fitted with a double bed for the parents' room, and a bunk bed in the other is perfect for up to three children or a second couple.

A Charming Terrace

Make the most of the space on the terrace of our Victoria 30 models, which can be extended in XL version or supplemented with an outside terrace, featuring a shade sail with the Victoria 20.

A barbecue party, right on your terrace

A holiday just isn't a holiday until you fire up the barbecue. That's why we're offering an optional barbecue kit for your lodge, complete with a stainless steel 3-burner gas grill featuring an additional hob at the side. It's the perfect way to cook a whole barbecue dinner, from the meat, fish and vegetables to all the side dishes you need. Turn your terrace into the ideal al fresco kitchen!

BALEARIC

A two-person lodge, perfect for a stopover or an overnight stay

The tent revisited

TheBalears is a two-person lodge, featuring a single bedroom (2.4m x 3.7m). It is the perfect stopover solution for hikers, cyclists and motorcyclists.

This is ideal for guests who will only be staying for one or two nights.

Small but solidly built

This lodge is extremely compact, but comes with all the latest features you would expect of a contemporary lodge. It can even stay up all year long (except in regions with heavy snowfall).

Simplicity and charm

With the natural-finish Tencate canvas, theBalears is the perfect lodge for a cosy, intimate night away, surrounded by nature.

Bungalow

CARIBBEAN

A classic bungalow, the traditional holiday home

Great value for money, with 2 or 3 bedrooms.

Made from PVC, the Caraïbes Bungalow can stay up all year round (except in areas with heavy snowfall). Each bedroom has a fabric lining to keep out draughts and insects, and smart storage solutions to make the most of the interior space.

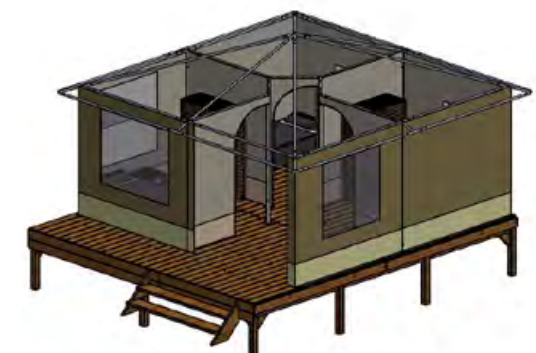

The Caraïbes Bungalow can house 4 people in 2 bedrooms, separated by a wardrobe. This is the ideal bungalow for guests who want the pleasure of a holiday under a canvas roof, the nostalgia of their childhood holidays and all the comfort they expect from a modern holiday home.

The 3-bedroom Caraïbes Bungalow

Maximising the sleeping potential of a smaller space

The Caraïbes Bungalow is also available with 3 bedrooms, housing 6 people in a 20m² space. This is ideal for group holidays, or for young people on holiday with their friends.

kit ancrage

This flooring can be adjusted to between 30 and 90cm off the ground and fitted with sixteen 90 x 90mm posts, ensuring that your structure is perfectly level on any type of terrain. Piloti flooring is a harmonious solution, providing a great base that blends seamlessly into your surroundings.

Piloti flooring

TRIGANO flooring offers top class strength and robustness, relying on the finest wood sourced from certified Scandinavian forests. It is made from wooden planks which have been **Class 4 autoclave-treated** according to current European standards.

Piloti flooring provides a great product lifetime and adaptability across all sorts of terrain without needing to excavate or level off your plot.

Positioned on **gravel-topped slabs**, the floor frame is made from 95 x 45mm strips and 120 x 45mm cross-ties.

The piloti-based floor comes with a 2-step staircase, or an optional 3- or 4-step staircase

Pre-cut terrace planks (27 x 145mm) ensure quick and convenient installation, and tarpaulin insulation under the floor prevents cold draughts entering the structure.

NB: Only the posts require cutting to adjust to the ground level.

Screws stainless steel

Ground-level flooring

This is independent of the piloti-based floorings. It comprises 95 x 45mm strips and 27 x 145mm terrace floor planks. The ground-level terrace can be fitted with a canvas shade.
